

Appln. No. 10/004,758

Attorney Docket No. 10541-636

I. Amendments to the Specification

Please amend paragraph [0020] as follows:

[0020] As shown in Figures 3, 4, 5a, and 5b, pinion 12 further includes a plurality of secondary edges 56 circumferentially formed along end face 50. As shown in Figures 4 and 5b, each secondary edge 56 integrally connects to a respective primary edge 52 at end face 50. Secondary edge 56 then radially ~~circumferentially~~ extends on end face 50. As described in greater detail below, secondary edge 56 further or secondarily cleans or moves particles along shaft 14.
